Portfolio: [nadamis.github.io/nada-portfolio/](https://nadamis.github.io/nada-portfolio/)

## PROFESSIONAL SUMMARY

Business Analytics professional with an M.S. in Business Analytics (First Honors) and a B.S. in Management Information Systems. Skilled in Python, SQL, R, Power BI, Tableau, predictive modeling, machine learning, forecasting, optimization, and data visualization. Combines analytics with systems analysis, QA, and UX thinking to translate complex data into clear insights and practical decision support.

## EDUCATION

### Master of Science in Business Analytics, First Honors

King Fahd University of Petroleum & Minerals (KFUPM) | 2024 - 2026

### Bachelor of Science in Management Information Systems

King Faisal University | 2016 - 2021

## EXPERIENCE

### Executive Secretary

Al-Kifah Academy | 2024

- Authored internal reports and process documentation for executive leadership, supporting clear communication across organizational levels.
- Coordinated daily operations and tracked requirements, identifying process inefficiencies and supporting data-driven improvements.

### Business Analyst Intern

Saudi Irrigation Organization | 2021

- Evaluated internal systems through structured testing, requirements validation, and usability analysis; presented redesign recommendations to business and technical stakeholders.
- Documented test findings, quality issues, and system requirements through structured reports and data visualizations.

## SELECTED ANALYTICS PROJECTS

### Evaluating Saudi Arabia's Potential as a Medical Tourism Hub

Master's Capstone | KFUPM Business Analytics

- Analyzed 79,000 healthcare records across Riyadh, Jeddah, and Madinah; applied regression, clustering, classification, and time-series forecasting to evaluate medical-tourism potential.
- Translated findings into stakeholder-facing recommendations on demand, patient segments, service readiness, and strategic decision support.

### Emergency Department Analytics

- Analyzed 90,036 complete emergency-department visits; compared forecasting approaches, built severity classification models, and identified three patient-flow clusters for operational planning.

### Mostakan Tea Room Business Analysis

- Used real business data, sales analysis, linear programming, and sensitivity analysis to support marketing budget allocation across five digital channels.

### Spam Detection Application

- Built an NLP spam-classification workflow using TF-IDF and SMOTE, compared three classifiers, and integrated the selected approach into a user-facing Flask web application.

## TECHNICAL SKILLS

- **Programming & Development:** Python, SQL, R, HTML, CSS, PHP, Flask
- **Data & Analytics:** Predictive Modeling, Machine Learning (scikit-learn), Forecasting, Optimization, Power BI, Tableau, Data Visualization, Microsoft Excel
- **Systems & QA:** Systems Analysis, Requirements Gathering, Software Testing, Technical Documentation, Quality Assurance
- **Design & Delivery:** UX/UI Design, Wireframing, User Testing, System Prototyping, Cross-functional Collaboration, Project Management

## CERTIFICATIONS

- Google UX Design Certificate, Google - 2024
- UX Design (Accelerated), Misk Skills - 2021
- Project Management Professional (PMP) Training, Exclusive Technology Training Center - 2021
- Commercial Marketing Management (CMM), Exclusive Technology Training Center - 2021

## LANGUAGES

- Arabic - Native
- English - Professional Working Proficiency

## LEADERSHIP & ACTIVITIES

- Member, MIS Club Council, King Faisal University - 2019 to 2020
- Member, College of Business Student Council, King Faisal University - 2017 to 2019
